## FOREWORD

The John M. Eisler Nurseries, located in Butler County, is one of the largest and most complete nurseries in Pa. You are cordially invited to visit us at any time, to inspect our stock & make your own selections. There is a map on the back cover of this catalogue that will assist you in finding our various locations.

Over 500 varieties of ornamental trees & shrubs are now being grown in our nurseries & have proven to be hardy during our severe winters. This hardiness which adapts these plants to our local climatic conditions should not be overlooked, as the lack of this hardiness in southern grown plants shipped to this area for sale makes them apt to winter kill under our conditions.

We maintain a complete landscape service and will be glad to plant your property for you. We are not professional landscape architects & wish to recommend their services. We will be very happy to assist you in any way possible with your particular landscape or gardening problems. We have, at present two graduate horticulturists to assist you. We have been growing plants for many years & will be glad to pass on to you the benefits of our experience with plants & plantings in this locality. For the convenience of our many customers who are busy during the week, our Bakerstown Office and Display Gardens will be open every day from morning until dark and also on Sunday afternoons.

## CONDITIONS OF SALE

The prices in this catalogue cancel all previous prices & are subject to change without notice. All orders for stock are subject to prior sale.

## GUARANTEE

This is governed by the Pennsylvania Nurserymen's Association Uniform Retail Replacement Agreement which is as follows: "Provided account is paid within thirty days & plants receive reasonable care, we will replace at one-half price of the plants, plus cost of planting, plants planted in the spring that fail to survive the following summer, or if planted in the fall, fail to leaf out the following spring."

Should we not have the same plants in stock, we reserve the right to give credit for an amount equal to one-half the cost of the plants lost, in other plants of your selection.

## ROSES

Rosa

Hybrid Tea Roses

Everblooming or Monthly Roses

Our experience with hybrid tea roses has taught us that after May 1st, the best method of handling them is to have the plants well established in pots before offering them for sale. They can be planted safely at any time of the year. Our roses are planted in large cloverset pots containing approximately 15 pounds of soil. We will be glad to replace any of our potted roses that fail to grow at no additional cost.

## GRAPES:

Brighton - one of the best red varieties bunch variable in size, flesh tender and juicy, red; early.

Caco - red, mid-season, fruit is very large and handsome. A rich wine-red color.

Concord - blue, mid-season. The most popular and extensively planted grape in America. It adapts itself to varying conditions and is grown in most every state in the union. Large, compact bunches of dark purplish black colored berries. The berries are covered with a rich bloom, skin is tender, but is sufficiently firm to carry to distant markets, flesh is juicy, sweet & tender.

Moore's Early - early dark blue, sweet & juicy.

Niagara - white, mid-season, best of the standard light colored grapes. Bunches of large greenish white berries change to pale yellow when fully ripe. A rank grower and very productive. Popular with vineyardists and home gardeners in the North, as well as the South.

Worden - Blue. This excellent grape is as hardy, healthy, vigorous and productive as Concord, of which it is a seedling, but better in quality. It is sweeter, larger in bunch & berry. Several days earlier. Valuable for garden and vineyard.

25 for 12.00 - 50 for 22.50 100 for 40.00

## BLUEBERRIES:

✓ Cabot - plants seldom exceed three feet in height and make a broad, low bush. The color of the new growth in winter is a light red over olive. The large berries have a delicious sub-acid flavor.

Concord - The bush is of upright habit and at maturity exceeds six feet in height. The young growth is bright red in winter. The berries are large, frequently reaching three-quarters of an inch in diameter. They usually ripen a few days earlier than Rubel and are fine in flavor and appearance.

Jersey - The bush is of vigorous habit and grows very large. The winter color of the young growth is a light red over golden brown. The berries are the largest of any here listed, light blue, and ripen about the same time as Rubel.

Rubel - a vigorous, productive variety. Well developed bushes stand six feet high and the winter color of the young wood is a rich red. The large berries of fine color are usually ready to pick the first week in July.

## RED RASPBERRIES:

✓ Latham - Red, large, round, richly brilliant red.  
A superb success in quality, production and profits. Fruit clings to stems several days after fully ripe. Mosaic free, early July.

Indian Summer - The wonderful everbearing red raspberry, thanks to the New York Experiment Station, here's a berry that is forging ahead in leadership, has very small seeds. Season early July through to mid-October. Berries large, roundish, conic, slightly irregular, good in quality. Heavy yielder.

Chief - Red, ripens ten days earlier than Latham. Very hardy, can be grown successfully in cold climates. Fruit is firm and of fine flavor. Unusually healthy and vigorous. Chief is a mosaic-proof and will not take on mildew.

Taylor - this new red raspberry promises to be the best of them all for the northern states. Plants are vigorous, hardy, productive, tall growing and increase rapidly. Sturdy canes hold the berries well off the ground. The berries, bright attractive red, are thick-fleshed, firm and of excellent quality. -- Selected 1 yr. No.1-Plants

MUSHROOM

MANURE

This is our best seller for lawns and gardens. Spent Mushroom Manure is real horse manure to which has been added 20% of fertile top-soil and has been used to grow one crop of Mushrooms in the huge limestone caverns of the Butler County Mushroom Farm at West Winfield. It is highly recommended and used by leading gardeners, golf courses, parks, rose growers, greenhouses, cemeteries, nurseries, landscape gardeners, fruit growers and others who are interested in building up their soil. A two inch covering worked into heavy clay soil will build it up so that you may have a permanent lasting sod. Mushroom Manure generally contains more Nitrogen, Phosphorous and Potash than ordinary Barnyard Manures. It is almost free of any odor and weed seed as is contained in regular stable manure. If you wish further information, please write to our Butler Office.

## -- LOWER PRICED LAWN SEED --

HAVEN GRASS SEED - general purpose blend of quick growing varieties that produces a pleasing lawn quickly and at moderate cost. Contains clover to assure quick covering.

1 lb. - \$.69      5 lbs. - \$3.35      25 lbs. \$15.85

THRIFTEE GREEN - Thrifty growing blend of seed for producing bright green lawns in a hurry. Competitive in price but even so, a value that will stand out.

1 lb. - \$.45      5 lbs. - \$1.98      25 lbs. - \$9.95

Note: We carry a large stock of straight grass seeds and will be pleased to quote on any mixture that you wish mixed to your requirements.

EISLER'S HUMUS - This is a fine grade of Peat Humus produced in Mercer County. It is a splendid soil conditioner and acts as a sponge in retaining moisture in the soil. Use it as a top dressing or mix it with your soil in preparing a seed bed. It is a splendid mulch for Rhododendrons, Ilex, Azaleas, and Laurel. It lacks the fertilizing qualities of Mushroom Manure but is higher in organic content.
